

DESCRIPTION

The Memorial Carrier is the design and creation of Wayne B. Morris sole inventor.

The Memorial Carrier is made of pine but can be made of other woods if preferred by client. The polls are made of 1" x 2", the bottom of the carrier base is 1" x 12", and the side frames are 1" x 4". The side panels are cut on 45-degree angles measuring 11 1/4" therefore making the outside 12 1/2" and are mitered together forming the box, which is screwed into the bottom base, which measures 11 1/4". After the box is completed it is then centered and screwed onto the two 31" polls.

The Memorial Carrier will have different decorative options that will be added to the initial Carrier base. The options include candleholders so as the Carrier box can have a candle on each corner, all different scrollwork which will be glued and or screwed to Carrier sides of base, and decorative molding screwed onto the Carriers base, and polls. The Memorial Carrier can be painted and or stained.

The Memorial Carrier will be marketed to Funeral Directors, Funeral Homes, Memorial Homes, Crematories, Florists, and businesses of the like.

REFERENCE	DESCRIPTION	MEASUREMENT
1	OUTSIDE FRAME OF BASE	12 1/2 inches
2	BASE OF CARRIER	11 1/4 inches
3	SIZE OF POLLS FROM BASE	9 inches
4	OUTSIDE FRAME OF BASE	12 1/2 inches
5	SIZE OF BOX	12 1/2 inches
6	HEIGHT OF BOX	3 1/2 inches
7	TOTAL LENGTH OF CARRIER	31 inches
8	HEIGHT OF POLL	1 1/2 inches
9	TOTAL HEIGHT OF CARRIER	5 inches
